Background to the new questions on the Pig movement licences

From 1 January 2021, every consignment of pork leaving a UK abattoir bound for the EU has needed an Export Health Certificate (EHC) which includes specific supply chain information and has to be signed by an Official Vet (OV). We have added three new questions to the movement licences to ease the gathering of information and provide the necessary evidence for completing the paperwork. From 9th March 2021, we have introduced redesigned pig movement licences (haulier summaries). We have attached sample documents:-

- 1) Farm to Farm
- 2) Farm to Slaughter
- 3) Farm to Market
- 4) Market to Farm not included tends to be generated by markets
- 5) Market to Slaughter

Licences to and from collection centre require the same questions to be answered as markets.

	Separation from wild cloven hooved animals	Quarterly vet statement	40 days	
Farm to farm	V	√		
Farm to slaughter	V	√	٧	
Farm to Market/CC	٧	٧	√ (CC only)	
Market/CC to farm:	٧		,	
Market/CC to slaughter	٧		√ (CC only)	

Where animals go through a market or collection centre we are not asking whether they have a quarterly vet statement (because they wont), we are asking for them to verify that the consignment of animals has been kept separate from birth from wild cloven hooved animals. This

Has this consignment of pigs been kept since birth in premises where measures have been in place to contain these animals within specific controlled buildings or enclosures?

The producers (farmers) will answer Yes or No to this question. This will be "translated" to the following statement appearing on the movement licence

These pigs have been separated from cloven-hooved wild animals since birth

The markets/collection centres will receive this information.

The markets (and collection centres will need to pass on this information to their customer (Farm or abattoir). If the incoming paperwork stated Yes for each batch of pigs that are being shipped out,

Has this consignment of pigs been kept since birth in premises where measures have been in place to contain these animals within specific controlled buildings or enclosures?

the market can also answer Yes when asked

otherwise NO will be the automatic response. This means that the pork from these pigs will be only suitable for the domestic market.

The licence from markets /CC to slaughter house/farm should also include the below statement on the licence.

Which will ultimately provide the information which enable the processor to export pork and the OV in an abattoir sign the EHC.

The introduction of the EHC for the export of animal by-products (ABP) requires the OV to attest that the animals were on the last holding of residency for 40 days minimum. WE have added a new question to the farm to slaughter and collection centre to supply this information:

The batch of pigs covered by the above movement licence have resided on the associated departure premises for a minimum of 40 days

The currently means that animals moving through markets cannot have their ABP exported and the ABP should be separated for domestic markets.

Conversely collection centres can respond Yes to the 40 day statement on behalf of the previous

farm if the incoming licence has Y for this question and ABP's can be exported.

These pigs have been kept on this holding for the past 40 days

Below are examples of the licences

Section A - Departure Details (1)

Report of a Farm to Farm Movement made under the General Licence for the Movement of Pigs Under the Disease Control (England) Order 2003 and Disease Control (Wales) Order 2003 (as amended)
